Severe Weather Outlook Wednesday, June 05, 2019

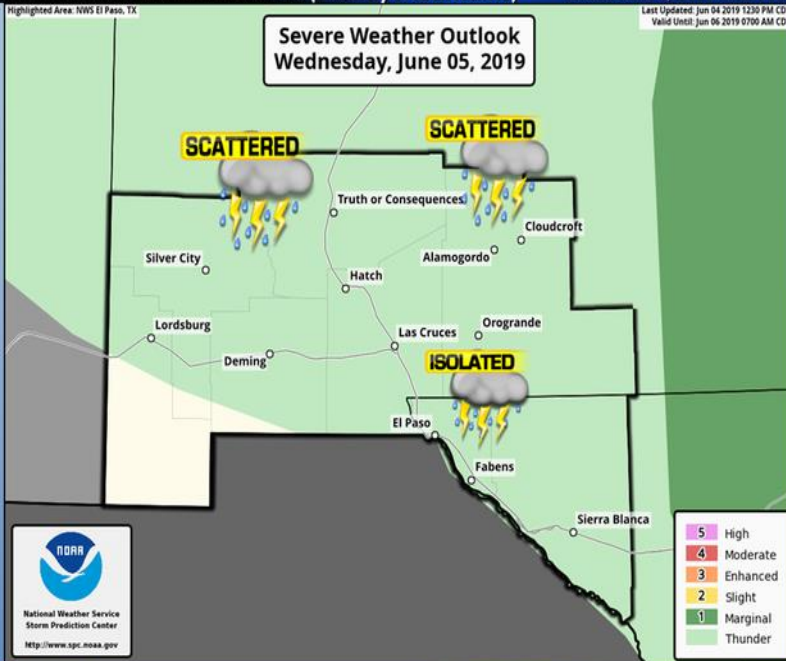

National Weather Service
Storm Prediction Center

<http://www.spc.noaa.gov>

Hazardous Weather

Fewer Storms Expected Wednesday Best Storm Chances Will Be North (Mainly Mountains)

Weather Forecast Office
El Paso, TX
Issued June 4, 2019 9:56 PM

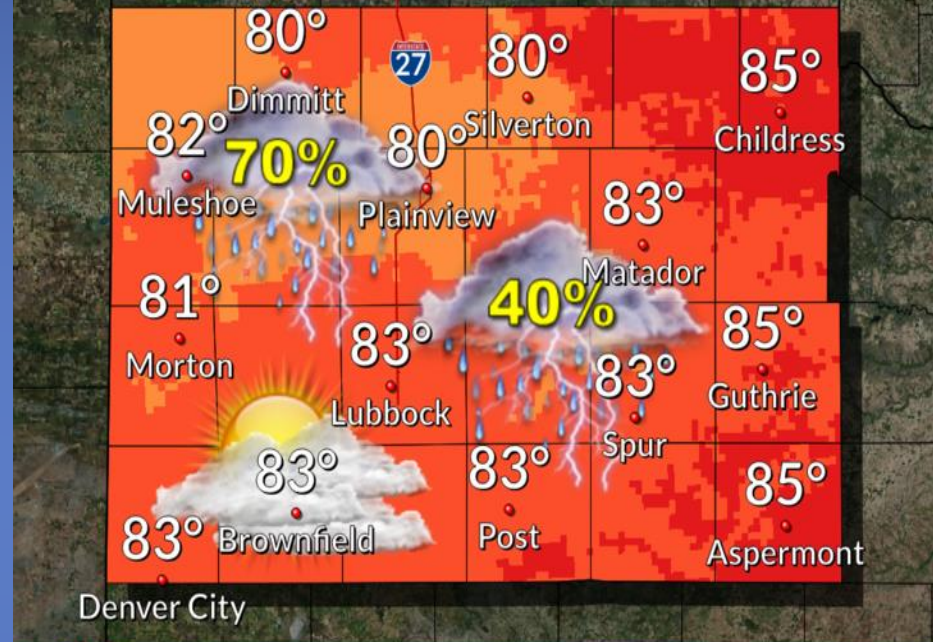

f t y NWSEIPaso

weather.gov/epz

An upper level low pressure system will be tracking just north of the Borderland Wednesday. This will help generate at least a few extra showers and thunderstorms for the area before things dry out and warm up heading into the weekend. The better rain chances will be located across areas to the north, with a focus on the mountains.

Sun and Clouds early - but storm chances climb later today expect a few strong storms and heavy rain

Weather Forecast Office
Lubbock, TX
Issued Jun 05, 2019 5:02 AM CDT

f t y NWSLubbock

weather.gov/lub

Today will see a little sun but more cloud as the day goes on. Storm chances also will increase later today heading into tonight. A few strong or maybe even severe thunderstorms could develop along with locally heavy rain.

Hazardous Weather

Today's Highs

Showers and thunderstorms likely across much of the area

Weather Forecast Office

Amarillo, TX

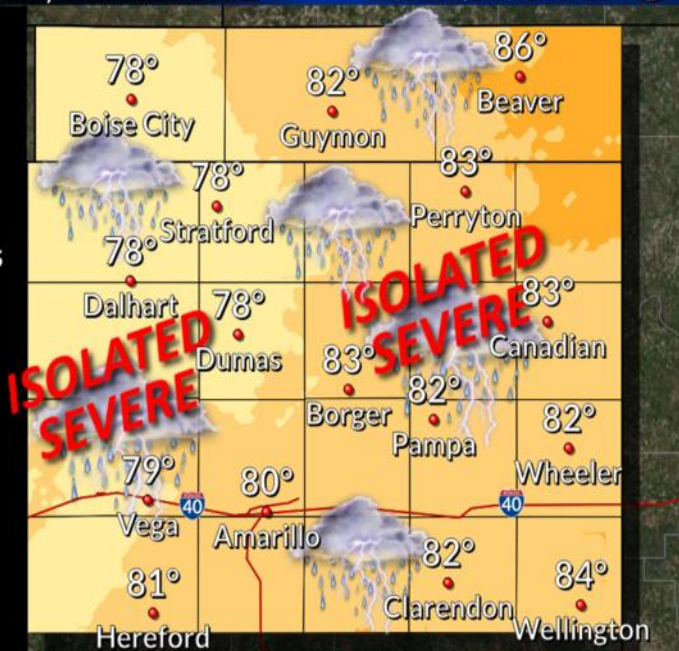

Issued Jun 05, 2019 4:27 AM CDT

Isolated severe storms possible

Large hail and damaging winds the main threats

Heavy rain may cause localized flooding

f t NWSAmarillo

weather.gov/ama

Showers and thunderstorms will be likely again this afternoon into tonight. Isolated severe storms will be possible. Heavy rain may lead to localized areas of flash flooding. Highs are expected to range from the mid 70's to the mid 80's.

A Wet Wednesday

Periods of Rain throughout the Day

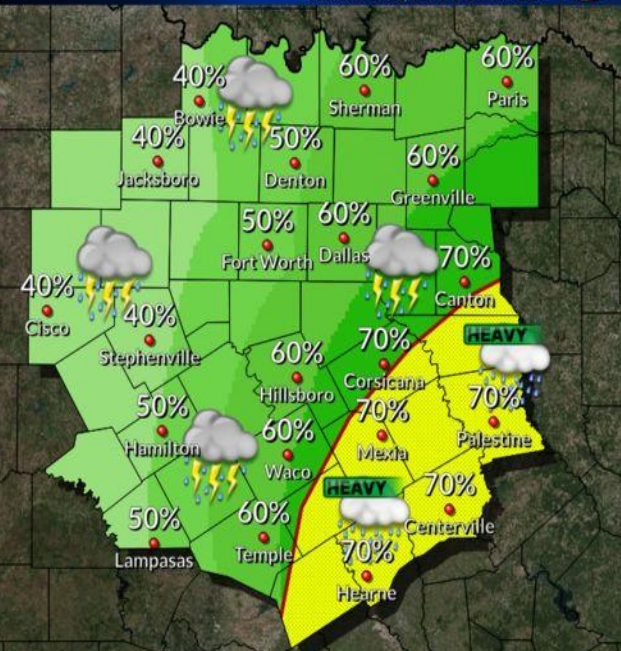

Weather Forecast Office

Fort Worth, TX

Issued Jun 05, 2019 5:03 AM CDT

- Showers and storms possible area-wide throughout the day
- Deep tropical moisture will be in place
- Heavy rain may lead to **localized flash flooding**, mainly across the southeast (yellow shaded region)

f t NWSFort Worth

weather.gov/fortworth

Scattered showers and thunderstorms will be fairly common across the region today due to the combination of abundant Gulf moisture and an approaching upper level low pressure system. The better coverage of precipitation will likely occur across the southeast where the highest moisture levels exist. This is also the most likely area to experience localized flash flooding. Clouds and rain should keep temperatures below the past few days with highs mainly in the lower 80s. Unfortunately, dewpoints in the 70s will make for a very muggy day.

Hazardous Weather

Wednesday Afternoon Highs and Rain Chances

High temperatures and rain chances from 7am to 7pm Wednesday.

Weather Forecast Office
Lake Charles, LA

Issued Jun 05, 2019 6:37 AM CDT

[f](#) [t](#) [v](#) NWSLakeCharles

[weather.gov/lch](#)

Wednesday: Showers and thunderstorms expected for a majority of the forecast area. Some of these storms could be severe and are expected to produce heavy rainfall.

Today | Scattered Showers & T-storms

High Temperatures: Low 90s - Low 100s | Mostly Cloudy Skies

Weather Forecast Office
Brownsville/RGV, TX

Issued Jun 05, 2019 5:11 AM CDT

[f](#) [t](#) [v](#) @NWSBrownsville

[weather.gov/rgv](#)

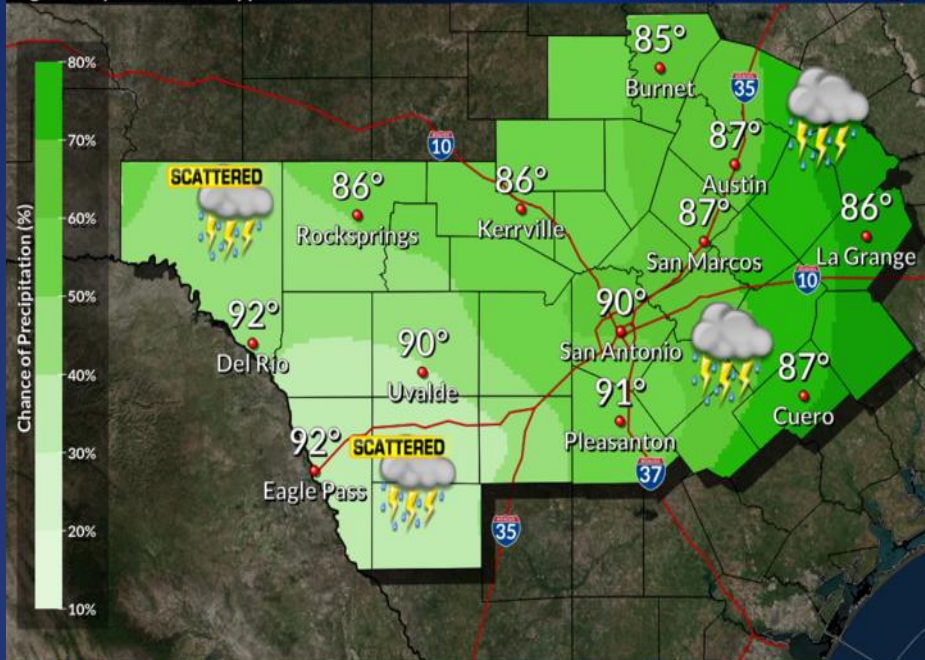

The chance of scattered showers and thunderstorms continues today, however it is not likely that we will see as much rain as we saw yesterday. Mariners can expect a moderate chop on the bay today, with Gulf seas around 5 to 7 feet. A Small Craft Advisory is in effect on the coastal Gulf waters (0-60 nm).

Hazardous Weather

Best Rain Chances In The East

Highs today will be in the upper 80s to lower 90s

Weather Forecast Office
Austin/San Antonio, TX
Issued Jun 05, 2019 3:45 AM CDT

f NWSSanAntonio

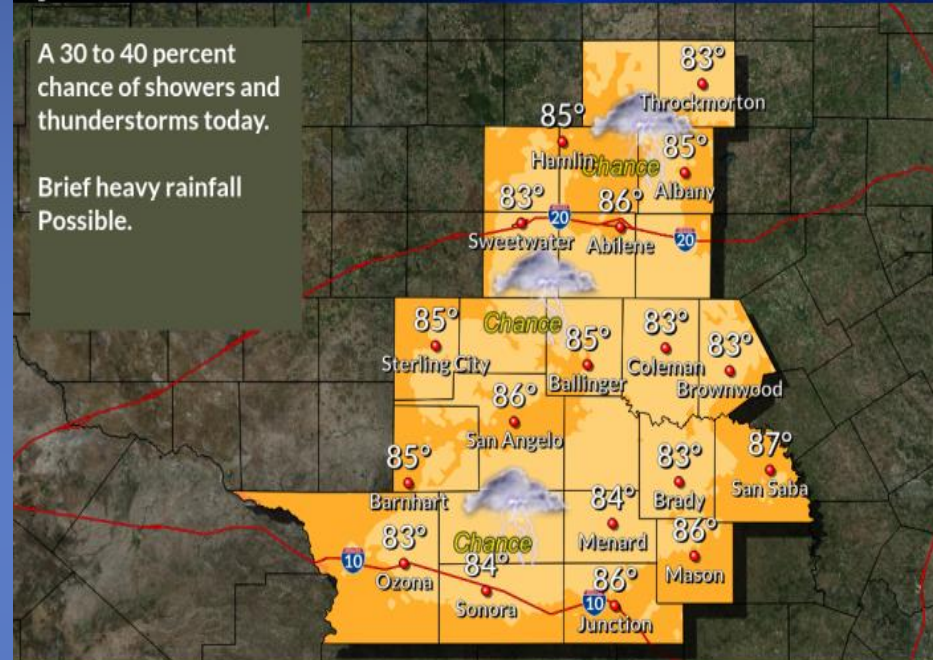

weather.gov/ewx

Rain chances will remain high today with the best chances in the east. Highs will be in the upper 80s to lower 90s across the area.

Today

Highs

Weather Forecast Office
San Angelo, TX
Issued Jun 05, 2019 4:53 AM CDT

f NWSSanAngelo

weather.gov/sjt

Isolated to scattered thunderstorms possible today with brief heavy rainfall.

Hazardous Weather

Thunderstorms Today

Slightly below normal today with lows returning toward normal.

Weather Forecast Office
Midland/Odessa, TX

Issued June 5, 2019 5:16 AM CT

Today

Tonight

f t NWSMidland

weather.gov/maf

Marginal risk of severe thunderstorms over the region today. Thunderstorms will move west to east later today and overnight with clearing expected for areas west of the Pecos, spreading into the Permian Basin overnight. Temperatures near to slightly below normal for both highs and lows.
